## Welcome to Payne

Payne are the leading manufacturers of high quality coated film in Europe, and we have unrivalled experience in supplying customers worldwide with a range of high quality products for uses in various markets.

Continual investment in technology and the development of innovative manufacturing techniques has strengthened Payne's reputation as a leading supplier of coated film products and solutions.

The latest coating and conversion facilities, combined with over 30 years experience in film manufacture, ensures that we deliver quality, efficiency and reliability.

## Corporate Background

Payne, established in 2005 from the merger of Morane, Laminex and PP Payne, is a leading provider of coated film, tear tape and security products.

Formerly Morane Ltd, Payne's coating operation has more than 60 years experience in the print encapsulation and lamination industry.

Payne's expertise in thermally activated films is established globally and its high profile client base includes Government passport agencies, national and international retail groups and many ID card applications.

With a comprehensive network of locally based sales operations supporting its production base at Banbury, UK, Payne offers a high level of service and flexibility that has already made it the market leader in many European countries including the UK. Continual investment in technology and R&D underlines Payne's commitment to developing new markets and opportunities.

Part of Filtrona, a supplier of fibre and plastic technology products to international niche markets, Payne operates from 12 sites in 9 countries and employs over 390 people.

## Payne's commitment to research and product development has resulted in a comprehensive product portfolio.

### Print Finishing

With a variety of finishes, constructions and sizes available, our customers are able to specify an encapsulation or lamination film to suit all applications, ranging from instruction materials and teaching aids to promotional materials, menus and browser catalogues.

Our premium range of Morafast films are exceptionally clear and designed to operate at low melt temperatures allowing high output for improved productivity – for detailed information please call or visit our website [www.payne-worldwide.com](http://www.payne-worldwide.com).

### Graphics Finishing

Payne offers the Elite range of films to suit an array of applications, including specialist products designed to meet the demands of the graphics industry. Offering greater alternative finishes, rigidity and a range of melt temperatures, our films have been optimised to work with all high quality lamination and encapsulation machines.

### Office Products

A selection of laminating roll films and document pouches are available to suit the needs of offices, schools and other low volume encapsulation and lamination users.

We are also able to supply a range of encapsulating/laminating machines that have been selected for reliability and ease of use.

### Industrial Applications

Long term investment in manufacturing equipment, has enabled Payne to match its specialist coating knowledge and experience to a number of bespoke contract coating projects for customers with non traditional industrial applications.

Contact the Payne technical team today, for the custom coating solution you've been searching for.

## Committed to Quality

### Quality & Service

Payne is committed to achieving the highest standards of product quality, reliability and service. Pursuing a 'first time right' approach, Payne aims to supply products that conform to customer requirements and strives to achieve the very best in customer service, with dedicated teams for both UK and export markets.

By maintaining these levels of quality Payne has been accredited with ISO 9001:2000.

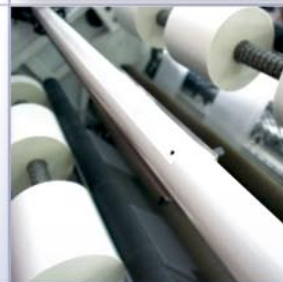

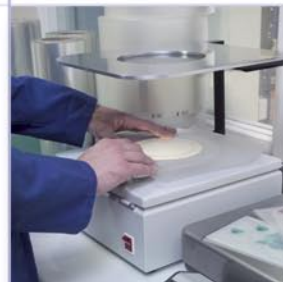

### The Environment

As a manufacturer of polymer based products, Payne is sensitive to its environmental responsibilities.

Because of this we have taken steps to limit waste, improve efficiency and reduce the environmental impact of our production facilities.

Due to these efforts Payne has been accredited with ISO 14001.
